

## SL-650QN / 200 m digital beam detector

The SL-650QN is a 200 m outdoor active infrared beam detector designed for protecting large areas. It can be used to control video surveillance and it can be integrated with a PIE-1 module.

- Outdoor coverage 200 m
- Four separate infrared beams
- Fully digital
- Easy alignment
- IP65
- Operating temperature -25°C... +60°C
