

FS-PM-1 / Firescape phase monitoring address unit

The FS-PM/1 unit sends the control signal directly from the phase monitoring relay modules in the multi-function panel to the Firescape system loop.

- Used in the Prodex FIREscape system to connect the phase monitoring relays to the addressable loop
- One monitored input
- To be used with a phase monitoring relay module, which provides a clear on/off control signal (not based on voltage fluctuation)
