

## HHL-ACCESS-RENEWAL / HHL software license renewal (36 months)

The HHL-ACCESS software is used for commissioning, programming and operating the HHL system. It can be used to control and operate more than 3000 central units from 12 different client PC's.

- For programming, monitoring and remotely operating the central unit.
- Supported operating systems: Windows 7 and 10, and Windows Server 2012 R2, 2016 and 2019
- The new version does not offer USB port protection. The software can be installed in a virtual environment.
- Download the installer from the mediabank, the license is sent by e-mail.
- When ordering the renewal, give the license number and the holder of the license.
- The license is valid for 36 months from the date the licence is ordered.
