

OBSERON-LPR-V3 / Obseron license

Obseron's license plate recognition automatically opens gates and booms for vehicles that have been defined as free access. Limit access according to gate, time or number of openings and browse license plates with different search criteria.

- Vehicle access through the gate can be restricted by days and times of the week
- Access levels define the gates through which the vehicle can pass
- A specified number of gate openings can be given to the vehicle
- The access level can be vehicle-specific or shared
- List the recognized plates
- Click to open the camera image from the moment of detection
- Filter search results
